Web Development Portfolio

24go

24go.lpiv.co | github.com/LockettPundt/Group-Front-End-Project   Feb. 2020

- The concept for 24go is to provide users with a single search point to find local events or cultural sites to visit during a 24 hour period. It uses various APIs to aggregate and return information to the user of what's happening that day in the user's inputted location.
- Written in JavaScript, HTML and CSS.

Pandemic Georgia

pandemic-georgia.lpiv.co | github.com/LockettPundt/pandemic-georgia   Mar. 2020

- Based on the popular board game Pandemic, we set out to create a smaller and more localized version of the game, taking place in Georgia. The players cooperatively try to find a cure by travelling around infected cities and curing them. Upon 4 research breakthroughs, the pandemic will be cured.
- Written in postgreSQL, JavaScript, HTML, CSS, Express and Node.js.
